

Broadleaf Evergreens are NEW!

and when you use these lovely plants—which keep their leaves (not needles) throughout the year—you achieve a subtle and luxurious beauty not possible with other plants.

From our own severe trial plantings we have selected 12 varieties that are outstanding in hardiness, adaptability and beauty. But check our hardiness map to be sure the plants you desire are adapted to your locale.

Troubled with shady spots? Broadleaf Evergreens, as a class, endure shade far better than most plants.

Oregon Grape Holly

OREGON GRAPE HOLLY

(Mahonia aquifolium)
(Hardy Zones 3 to 7, Max. Hgt. 5 ft.)
Easily grown, with shiny, holly-like leaves and clusters of yellow flowers followed by bunches of blue berries. This broadleaf evergreen is attractive and hardy. Thrives in shade or sun. Excellent in the foundation planting. Ornamental foliage is useful for cutting purposes.
Four-year transplants, 12 inches, moss-balled.
Each \$1.80 Each per 3 \$1.60 Each per 6 \$1.50
Institutional Price Each Per 20 or More \$1.25

ROUND LEAF JAPANESE HOLLY

(Ilex retundifolia)
(Hardy Zones 5 to 9, Max. Hgt. 6 ft.)
One of the finest new broadleaf evergreens for hedging purposes. Hardier and generally superior to other forms of Japanese Holly. If you have been wanting an evergreen hedge to enclose a patio, you will be delighted with this plant.
Rich, almost black-green foliage contrasts well with other foundation plants such as Yews and Junipers. Readily trimmed to any desired shape. Evergreen foliage and black berries particularly striking against background of fresh snow.
Field-grown, 10 to 12 inches, moss-balled.
Each \$1.60 Each Per 3 \$1.50 Each Per 6 \$1.40
Institutional Price Each Per 20 or More \$1.25

STRAWBERRY COTONEASTER

(Cotoneaster aciculata)
(Hardy Zones 4 to 8)
Outstanding among the glamorous Cotoneasters—considered far superior to any of the other low spreading forms. The berries are gorgeous, largest of the Cotoneasters so far as we know, brilliant glossy red and plenty of them to bring color to the garden through late summer, fall and winter, or until consumed by birds.
A truly delightful shrub for border or foundation planting.
2-yr. heavy transplants.
Each \$1.25 Each Per 3 \$1.15 Each Per 6 \$1.00
Institutional Price Each Per 20 or More \$0.90

ENGLISH BOXWOOD

(Hardy Zones 5 to 9, Max. Hgt. 10 ft.)
Use as a specimen or in hedging. Boxwood is a very slow grower and develops compactly without any trimming.
Will thrive in shaded locations and takes kindly to a peat moss mulch. Does not like harsh climate. Our plants are grown right here in Elsberry and will thrive wherever Boxwood is hardy.
Dwarf, dark green, 3-yr., twice transplanted, 6-9 in.
Each \$0.75 Each Per 3 \$0.70 Each Per 6 \$0.60
Institutional Price Each Per 20 or More \$0.50

VIBURNUM BURKWOODI

(Hardy Zones 5 to 8, Max. Hgt. 5 ft.)
Called Gardenia-scented Viburnum because its delicate heads of pale pink bloom fill the garden with the fragrance of Gardenia on still summer evenings. Leathery evergreen to half-evergreen foliage takes on a clove autumn coloration. Plant in full sun or partial shade. Soil should be moist but not soggy. Several plants near perfect. A heady, tropical aroma that will delight you.
Moss-balled, 10 to 12 inches.
Each \$2.00 Each Per 3 \$1.75 Each Per 6 \$1.50

American Holly

(Ilex opaca)
(Hardy Zones 5 to 9, Max. Hgt. 30 ft.)
Everyone knows the American Holly and little needs to be said of its merits. It is our only native northern broadleaf evergreen tree and most gardeners agree it is our best.
Priceless at Christmas. Cutting branches only increases the density and form.
Our plants are grown from selected northern types and are frequently transplanted to assure good planting results. Plant several for pollination and berry production.
Moss-balled, 10 to 12 inches.
Each \$1.80 Each Per 3 \$1.60 Each Per 6 \$1.50

GLOSSY ABELIA

(Abelia grandiflora)
(Hardy Zones 5 to 9, Max. Hgt. 4 ft.)
Handsome broadleaf evergreen shrub famous for long flowering season—May till frost. Dense, glossy foliage excellent background for white, pink flushed masses of bloom.
Use generously in the foundation planting where low shrubs are indicated or create a trim, tidy hedge (set 2 feet apart) which requires a minimum of pruning. Will endure light shade and succeeds in any reasonably good garden soil. Truly a garden gem.
Field-grown, 3 times transplanted, 18-24 in.
Each \$2.60 Each Per 3 \$2.50 Each Per 6 \$2.25
Institutional Price Each Per 20 or More \$2.00

ALSO SEE JAPANESE ANDROMEDA ON OTHER SIDE

Strawberry Cotoneaster

English Boxwood

Viburnum Burkwoodi

American Holly Berry

American Holly

Rose Gardenia

ROSE GARDENIA

(Gardenia veitchii)
(Hardy Zones 8-9, Max. Hgt. 3 ft.)

Well known winter blooming Gardenia used extensively by florists. Our plants are in bud and will soon furnish waxy white corsage blooms. Foliage rich, lustrous green.

Culture same as Geraniums. Can stand but few degrees of frost; so transplant indoors before killing frost this autumn.

Plants out of 3-inch pots, bushy.

Each \$0.75 Each Per 3 \$0.60

Scarlet Firethorn

Magnolia Grandiflora

MAGNOLIA GRANDIFLORA

(Hardy Zones 6 to 9, Max. Hgt. 35 ft.)

No other broadleaf evergreen is like the fabulous Southern Magnolia—huge, leathery, evergreen leaves. Flowers are pure white, fragrant, saucers 8 in. in diameter.

This "romantic Magnolia of the South" towers to 90 feet in its southern range but is more often 20 or 30 feet when grown in the North.

We are considerably north of the Magnolia Grandiflora native range, yet our plants have thrived beautifully and are well acclimated. This plant is such a garden prize that it is worth planting in a protected spot even if you live in Zone 5.

Field-grown, moss-balled, 15 to 18 inches.

Each \$2.25 Each Per 3 \$2.00

SCARLET FIRETHORN

(Pyracantha coccinea)
(Hardy Zones 5 to 9, Max. Hgt. 6 ft.)

Our northern selection of Firethorn which we raise from seed, is one of the hardiest strains. Abundance of brilliant berries is this plant's strong suit, as these berries linger on the plant well into the winter months. Pyracantha will be the plant to use against a fireplace or at the corner of a building where mass effect is desired. Leaves will remain all winter in the southern states, but you may find some defoliation during the winter in the North. No other evergreen has such an abundance of red berries... nothing is more attractive against a home!

Out of 6-inch pots, 8 to 10 inches.

Each \$1.25 Each Per 3 \$1.10 Each Per 6 \$1.00
Institutional Price Each Per 20 or More \$0.75

WINTERBERRY

(Euonymus patens)
(Hardy Zones 5 to 7, Max. Hgt. 6 ft.)

A wonderful broadleaved evergreen shrub. We are amazed at the way it will thrive in deep shade as well as full sun.

Completely hardy. Use it generously in the foundation planting or for hedging or screening. Use it free-growing or sheared to any size or shape. Its rich, leathery foliage, white flowers in spring and masses of Bittersweet berries in fall and winter provide year-round charm.

Our type Winterberry is unusually dense and bushy and we have never had a better block of plants to offer.

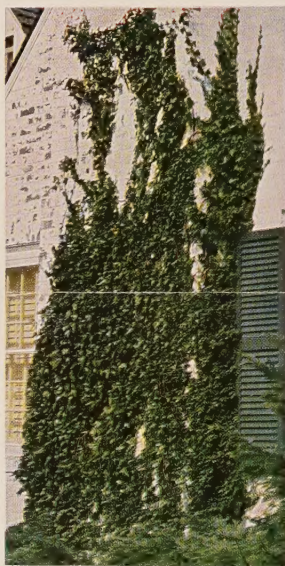

Field-grown, moss-balled, 18 in. spread.

Each \$2.60 Each Per 3 \$2.50 Each Per 6 \$2.40
Institutional Price Each Per 20 or More \$2.25

Winterberry Vine

VINES ARE ESSENTIAL

Baltic Ivy

Silver Lace Vine

CLEMATIS JACKMANI

(Hardy Zones 5 to 9, Max. Hgt. 12 ft.)

Huge, velvety violet-purple flowers are of a color not shown in any other vine. Dozens and dozens of Clematis have been introduced but none in our estimation, rival the glory of Jackman Clematis.

Grows rapidly through summer and early autumn and blooms all summer long. Likes fertile moist, cool soil and a protective mulch.

Use freely on pergola, fence, upright supports or rocks.

Potted plants.

Each \$1.30 Each Per 3 \$1.25 Each Per 10 \$1.10

BALTIC IVY

(Hardy Zones 4 to 9, Max. Hgt. 30 ft.)

Hardy form of English Ivy. Best evergreen vine for planting North as well as South.

Unexcelled for covering walls of stone and brick. Equally useful as ground cover where grass is shaded out, or for shaded embankments. Spreads and covers rapidly. Plant 2 feet apart each way. Our established pot plants never stop growing.

Each \$0.59 Each Per 3 \$0.50 Each Per 10 \$0.45

GOLDFLAME HONEYSUCKLE

(Hardy Zones 5 to 9, Max. Hgt. 20 ft.)

Everblooming. Hundreds of fragrant flowers are carmine outside, pure gold inside. Vigorous, strong grower. May be trimmed as a vine, shrub or low hedge. Not touchy as to soil or growing conditions. Far and away the most striking Honeysuckle vine we believe.

2-year, field-grown plants.

Each \$1.25 Each Per 3 \$1.10 Each Per 6 \$1.00
Institutional Price Each Per 20 or More \$0.90

Clematis Jackmani

SILVER LACE VINE

(Hardy Zones 4 to 9)

Imagine a hardy vine that will grow 20 feet or more in a single season! And one of breath-taking beauty to boot!

The fleecy flowers of Silver Lace burst forth in a misty cloud in late summer when few woody plants are in bloom.

Perfectly clean. Insects do not bother it. Plant in a sunny location for best growth.

Field-grown, No. 1 plants.

Each \$1.10 Each Per 3 \$1.00 Each Per 6 \$0.90
Institutional Price Each Per 20 or More \$0.75

HEDGING PLANTS

HARDY CALIFORNIA PRIVET

(Ligustrum ibolium)
(Hardy Zones 4 to 9, Max. Hgt. 8 ft.)

At last a Privet that combines the rich, glossy texture of tender California Privet with the hardiness of the common Privet of the North. If you desire a rapid-maturing formal clipped hedge, Privet is a standard plant to use and our type is definitely superior to other types heretofore offered northern gardeners.

While the best of the Privets are not in a class with the finer evergreen hedging plants, it is noteworthy that Hardy California Privet is semi-evergreen even in the northern states. 12 to 18 inch plants, well branched. Plant 1 foot apart.

DWARF BLUE LEAF WILLOW HEDGE

(Hardy Zones 4 to 9, Max. Hgt. 4 ft.)

Exciting new silver-blue hedge plant. Completely hardy and a true dwarf Willow. We have observed this plant go through our recent Sahara-like summers and have been frankly amazed at the way the feathery, willowy, compact foliage stood the worst of the drought without flinching.

Use it trimmed as a colorful, low formal hedge around beds or walks. Let it grow untrimmed where you wish a soft, striking mound-shaped hedge 3 to 4 feet tall. Plant one foot apart. 12 to 15 inch plants.

Dwarf Blue Leaf Willow Hedge

RED LEAF BARBERRY

(Hardy Zones 5 to 9, Max. Hgt. 4 ft.)

Great improvement over the older green Japanese Barberry. Blood-red leaves provide rich color to home grounds from spring till fall and red berries remain to provide winter color. One of the most serviceable low hedge plants. Requires little if any trimming and grows in almost any soil. Noted for ability to withstand dry conditions. Plant in full sun one foot apart for tight hedge. 12 to 15 inch plants.

Outstanding SHADE TREES

Sweet Gum

SWEET GUM

(Hardy Zones 3 to 9, Max. Hgt. 120 ft.)

Our most beautiful shade tree. We consider Sweet Gum the most handsome tree we can offer that also possesses merits of rapid growth, freedom from disease, hardiness and wide adaptability. Its star-shaped leaves are unlike any other tree and no tree displays such a riot of autumnal colors. Growth is columnar and stately yet its branches spread enough to provide abundant shade. Clean, neat, with interesting corky bark.

Our moss-balled trees transplant perfectly.

Field-grown and bushy, 3 to 3½ ft. moss-balled plants.

LITTLE LEAF LINDEN

(*Tilia cordata*)

(Hardy Zones 3 to 9, Max. Hgt. 90 ft.)

Our choice of all the trees in the Linden group because of its dense habit and tight pyramidal growth. Moderate growth rate. Fragrant yellowish flowers appear in July. Very hardy. Plant in sun or partial shade.

For permanent lawn specimen, or avenue tree, you can plant with confidence knowing this is one of the finest hardwood trees available.

Moss-balled, 3 to 3½ ft., heavy caliper and branched.

American Plane

AMERICAN PLANE

(*Platanus occidentalis*)

(Hardy Zones 3 to 9, Max. Hgt. 100 ft.)

There are locations where one needs a shade tree that will grow into a big, robust fellow and here the Plane Tree fills the bill. It is also famous for tolerating city fumes and smoke.

Give the Plane plenty of growing room. You'll like the way it "makes up" in a hurry. The shaggy bark, showing pale green beneath, is a distinct feature not found in any other tree. Its mottled shade permits grass to grow beneath.

Little Leaf Linden

SHADE TREES are the key feature of any landscape, and soon become priceless assets to the home grounds. Whatever else you must forego, do not delay planting shade trees. Remember, a tree costing a couple dollars now will be irreplaceable for \$100 in a few short years. Frame your home with shade trees. Spot two or three to shield your garden and house from the sizzling sun of afternoon. Give them elbow room—plant no closer than 20 or 30 feet. We have selected 10 trees which are notable for attractive features, hardiness, rapid growth, and freedom from pests. Choose several to meet your particular requirements and order promptly for early spring planting—and while the list is intact.

ALL SHADE TREES

6 ft., field-grown except where designated otherwise.

Each	Each Per 3	Each Per 6	Institutional Price Each Per 20 or More
\$2.25	\$2.15	\$2.00	\$1.75

LACE LEAF or GREEN ASH

(*Fraxinus lanceolata*)

(Hardy Zones 2 to 8, Max. Hgt. 70 ft.)

Best of all Ashes for home planting. A fine, stately tree that transplants wonderfully well. Light, lacy shade encourages luxuriant turf.

Foliage is soft pale green and its growth form is upright and confined rather than wide spreading. It is difficult to imagine a home grounds that will not benefit from at least one Ash tree.

SILVER MAPLE

(Hardy Zones 3 to 9, Max. Hgt. 80 ft.)

Broad, spreading tree with tremendous get-up-and-grow. Completely hardy. Foliage light green above and silvery below casts soft, filtered shade that does not suppress grass.

Useful as a temporary tree for quick shading effect between slower growing trees.

Thornless Honeylocust

THORNLESS HONEYLOCUST

(Hardy Zones 3 to 9, Max. Hgt. 90 ft.)

For street and lawn planting this tree is one of the more favored to replace American Elm. Racemes of fragrant, creamy flowers appear in May. Lacy, delicate foliage lends an exotic effect. Excellent with modern architecture. A legume (like Clover), it actually feeds and encourages a rich turf.

It is rapid growing, perfectly hardy and at home in all types of soil. Definitely a shade tree of distinction.

Tulip Tree

Tulip Tree Flower

TULIP TREE

(Hardy Zones 4 to 9, Max. Hgt. 150 ft.) The Tulip is a stately tree and a fine specimen for large open areas. It is not suited for restricted grounds. The tree is often over-sold on its Tulip-like flowers—these are rather inconspicuous and do not appear for several years after planting.

But it is a fine rapid-growing specimen shade tree with unusual leathery leaves. Prefers good soil. Do not confuse these fine, developed nursery grown plants with collected wildlings that seldom live.

4 to 5 ft., field-grown.

CHINESE CHESTNUT

(Hardy Zones 4 to 9, Max. Hgt. 60 ft.)

This is the new, improved Chinese Chestnut that has had all the favorable reports in national magazines recently. Large, sweet, richly flavored nuts are borne on trees when only 3 to 4 years old.

I have planted many trees of this new Chinese Chestnut right here at Elsberry and honestly believe it is the most practical nut tree to plant—others are too slow growing and too slow to bear.

Good form and rich, lustrous, shiny green leaves make it a splendid lawn and shade tree as well as nut tree.

Plant at least two trees for pollination in well drained, sunny location. 4 to 5 ft., field-grown.

SPECIAL OFFERS

Introducing - GORGEOUS FRAGRANT HONEYSUCKLE HEDGE

A rare hedge item with a combination of qualities seldom found in any shrub. Throughout the spring its creamy white flowers will fill your garden with a delicate and bewitching fragrance. It is called Winter Honeysuckle because its scented flowers appear with the last snows and because the foliage is semi-evergreen. Its masses of ruby fruits appear in early summer before almost any other shrub and are a welcome treat to nesting songbirds.

Fragrant Honeysuckle is clothed in lustrous foliage, blue-green below and deep emerald above, that persists well into winter.

It is completely hardy, thrives in full sun or partial shade and is not finicky as to soil. Adapted to city atmosphere where tender plants fail or to the sweeping winds of open countryside.

Its dense semi-evergreen character and moderate 6 to 8 foot height make it indispensable for background and border.

An eminent horticulturist writing of this variety says, "The stiff leathery, half-evergreen leaves are one of its chief attractions. Its early, very fragrant flowers are another, coming at a time when few other woody plants are in bloom. The fruit is produced about as early as fruit on any woody ornamental and the birds usually eat it quickly. The plant has been used with good success as a clipped hedge."

Never before has it been possible to secure a Fragrant Honeysuckle hedge at such an attractive price. Our plants are bushy, full-of-vigor, full 18-24 inch fresh-dug from our own fields.

This introductory offer good only while limited supply lasts.

25 ft. HEDGE \$2.76 50 ft. HEDGE \$5.00

12 Extra Strong 18-24 in. Plants (24 Plants)

SIBERIAN ELM SCREEN

(*Ulmus pumila*)

(Hardy Zones 3 to 9, Max. Hgt. 60 ft.)

Fastest growing screening you can plant—5 feet growth per year is commonplace. Few trees are so drought-resistant or suited to so many soils and locations. Free of blights that plague American Elm. We consider this plant much better for screening than Lombardy Poplar.

Use for screening, windbreak or high hedge. Plant 2 feet apart in single row for immediate effect. 2 to 3 ft., field-grown seedlings.

25 for \$2.00 100 for \$7.50 1000 for \$60.00

Clump White Birch

CLUMPS OF WHITE BIRCH

(Hardy Zones 2 to 5, Max. Hgt. 60 ft.)

Our White Birch is the famous Paper Bark or Canoe Birch native to the northern woodlands—recognized as the best variety for clumps. Much superior to European variety generally offered. A clump of White Birch is invaluable for creating that informal natural atmosphere so desired in the landscape of today. Plant three trees in one hole for clump effect.

Golden Weeping Willow

GUARANTEE

We guarantee each order will be filled with fresh dug stock of superior quality and we guarantee it will reach you safely and undamaged in a live, vigorous condition, ready to grow.

We further guarantee our plants to thrive for you if planted according to instructions that are furnished with each order acknowledgement, and if given intelligent and reasonable care. You could not expect us to replace stock lost due to bad drainage, drought, carelessness or neglect on the part of the planter, which are conditions beyond our control. In the event of any loss for whatever reason we will, however, share your loss and replace at one-half price any stock that fails to grow if you report by July 1st following planting.

Hugh Stevenson

FORREST KEELING NURSERY, Elsberry, Missouri

Siberian Elm Hedge

JAPANESE ANDROMEDA (*Pieris japonica*)

(Hardy Zones 5 to 7, Max. Hgt. 5 ft.)

Here is a four-season plant unsurpassed by any other in the broadleaf family. The creamy white pendulous clusters of blossoms appear in early April, followed by glossy summer foliage. In the fall rich tints of bronze color the leaves. Winter foliage stands out vividly against the snow. Andromeda will take to a half sun or fairly shaded situation. Unquestionably one of the very finest Broadleaf Evergreens.

Moss-balled, 18 inches, field-grown.

Each \$4.00 Each Per 3 \$3.75 Each Per 6 \$3.50

Elsberry, Missouri

Douglas Fir

For Year-Round Effect USE EVERGREENS

Remember, we are Evergreen Specialists—our field-fresh, acclimated stock, humus packed to reach you in perfect condition, is sure to please. Nothing makes a house a home like evergreens. Our prostrate and spreading kinds are "just right" for under your picture window or to soften harsh foundation lines. Upright types are so important for accenting doorways and other features; for specimen planting and for evergreen hedging, screening and background. For the older home smothered in over-grown shrubs, replacement with our evergreens will provide a fresh, new look.

BLUE DOUGLAS FIR

(*Pseudotsuga taxifolia glauca*)
(Hardy Zones 4 to 6, Max Hgt. 100 ft.)

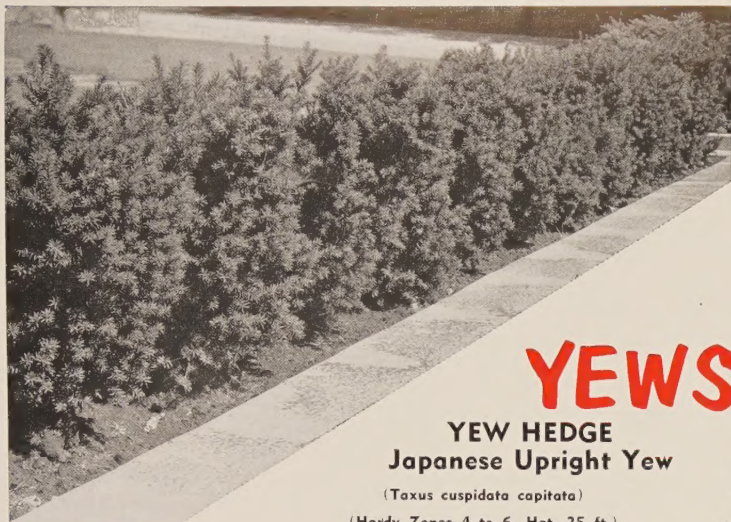

One of the finest tall-growing evergreens that can be planted. Ours is the bluish Rocky Mountain strain, much superior to Pacific or inter-mountain types for planting in the Midwest or East.

If you drive out this way let us show you plants that are 10 or 12 years old and you will agree there is nothing more handsome.

Special Transplant Offer

8 to 10 in.
10 for \$1.50 25 for \$3.00 100 for \$10.00

YEWS

YEW HEDGE
Japanese Upright Yew

(*Taxus cuspidata capitata*)
(Hardy Zones 4 to 6, Hgt. 25 ft.)

Yew is unexcelled for evergreen hedging. Shears beautifully, thrives in shade or sun. Fertile soil is important and good drainage essential. Only Holly or Boxwood can be compared with Yew as luxury hedging. For the first time, this year we offer potted Japanese Yews, bringing this superb hedging within reach of the most modest budget.

Out of pots, 9 to 12 in. transplants.
Each 75¢ Each Per 3 70¢ Each Per 25 or More 60¢

PINES-

SCOTCH PINE

(*Pinus sylvestris*)
(Hardy Zones 2 to 7, Max. Hgt. 75 ft.)

Most popular evergreen for Christmas tree planting and with good reason. It is much easier to get a "catch" with Scotch Pine than other evergreens. It will grow in blow sand, the meanest clay or in a rock pile. Like other Pines, all it needs is good drainage. Makes a dense bushy growth that shapes well. Ours has a good blue-green cast, and is unusually fast growing. For quick cover, windbreak and background it is tops. Prices at right.

NORWAY PINE

(*Pinus resinosa*)
(Hardy Zones 2 to 5, Max. Hgt. 75 ft.)

Here is a tree that many think will become the foremost plantation Christmas tree, and those who have decorated a full-body Norway Pine (or Scotch Pine) in their homes will never willingly go back to a thin, shipped in tree.

Also useful for screening, climate control and woodland planting. Plant in the open as it does not tolerate shade. Prices at right.

ARBOR-VITAE

GREEN PYRAMID ARBOR-VITAE

(*Thuja occidentalis pyramidalis*)
(Hardy Zones 2 to 6, Max. Hgt. 25 ft.)

Very striking evergreen, with flat deep rich green foliage. Retains shape without shearing into natural pyramid form. For background plantings, or at building corners, or in front of pillars this kind of the Arbor-Vitae can't be beat. Definitely one of our most popular evergreens. Holds color all through the year.

Field-grown and moss-balled, 24 to 30 inches.

Each \$3.25 Each Per 3 \$3.00 Each Per 6 \$2.75
Institutional Price Each Per 10 or More \$2.50

Green Pyramid Arbor-Vitae

BLACK or AUSTRIAN PINE

(*Pinus nigra*)
(Hardy Zones 4 to 6, Max. Hgt. 70 ft.)

Most widely used Pine tree for ornamental planting. Excellent for backgrounds, windbreaks, screening. Shaggy, dark green foliage. Famous for resisting heat, drought and city smoke. Prices below.

PINE PRICES

This spring we have an unusually fine group of 3-year transplanted NORWAY PINE, AUSTRIAN PINE and SCOTCH PINE, your choice, at values you can't duplicate for trees of this size and quality (please allow us to substitute one variety in the likely event we are sold out when your order is received).

3-year transplants, 8 to 12 inches.
6 for \$1.00 20 for \$2.75 100 for \$13.00

Decorative JUNIPERS

SPINY GREEK JUNIPER

(*Juniperus excelsa stricta*)
(Hardy Zones 4 to 9, Max. Hgt. 8 ft.)
This is not a first-rate evergreen but is such a trim and tidy fellow when young we decided to list it. We have a block of 1,000 12 to 15 inch plants as compact and shapely as you have ever seen. They are very good for doorstep, foundation, urn or windowbox planting, and the price you will note will make them go in a hurry.
Field-grown and moss-balled, 12 to 15 inches.
Each \$2.25 Each Per 3 \$2.15 Each Per 10 \$2.00

Institutional Price Each Per 20 or More \$1.75

WAUKEGAN JUNIPER

(Hardy Zones 2 to 5, Max. Spread 4 ft.)

We have selected this as the outstanding low, trailing, prostrate evergreen. Its steel-blue, needle-like foliage does not become so ragged with age as other low Junipers. Turns deep purple in fall.

Splendid for embankments, grave covering, softening concrete edges and elsewhere where a mat of luxuriant evergreen foliage is needed. Our plants are exceptionally nice this year. Prices below.

Any of our 3 Spreading Junipers, field-grown, moss-balled, full 15-18 in. spread—your choice in any combination.
Each \$2.80 Each Per 3 \$2.55 Each Per 10 \$2.40
Institutional Price Each Per 30 or More \$2.25

Pfitzer Juniper

PFITZER JUNIPER

(Hardy Zones 4 to 9, Max. Spread 5 ft.)

Pfitzer Juniper is perhaps the most universally satisfactory and useful evergreen shrub of them all. We grow thousands of them and never seem to have enough. It is "just right" for so many locations.

Exceptionally handsome and hardy, its feathery grey-green foliage covers arching, spreading branches and makes it particularly useful in the foundation planting or as an informal border. It will stand considerable shade and is likewise drought resistant.

No other evergreen I know flourishes so well from the Gulf to the Great Lakes and from coast to coast.

We offer both the Green and the Blue forms. Specify color. Prices at left.

Andorra Juniper

ANDORRA JUNIPER

(Hardy Zones 4 to 8, Max. Spread 4 ft.)

One of the very best semi-prostrate evergreens available. Not so low-growing as Waukegan Juniper.

Distinctive silvery green foliage in summer; rich purple tones in winter. Shape is much like a low, broad vase which makes it extremely useful in foundation plantings, terraces and rockeries. Completely hardy. Prefers a sunny location.

Wish you could see our beautiful block of plants. Prices at left.

CANNAERT JUNIPER

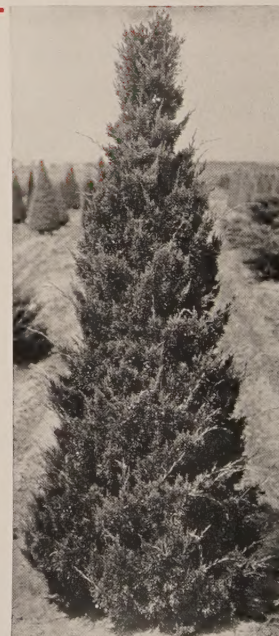

(Hardy Zones 2 to 8, Max. Hgt. 25 ft.)

This is our favorite upright-growing Juniper. Heavily tufted lustrous deep green foliage is its distinguishing charm. Masses of porcelain-blue berries add to its beauty and attract winter birds. Grows vigorously but may be trimmed to desired height. Not choosy as to soil and tolerates more shade than most Junipers.

It would be difficult to select a better upright growing evergreen for foundation or doorway planting, accent or screening.

Field-grown, moss-balled, 18 to 24 inches.

Each \$3.60 Each Per 3 \$3.50 Each Per 6 \$3.25 Each Per 20 or More \$3.00

Cannaert Juniper

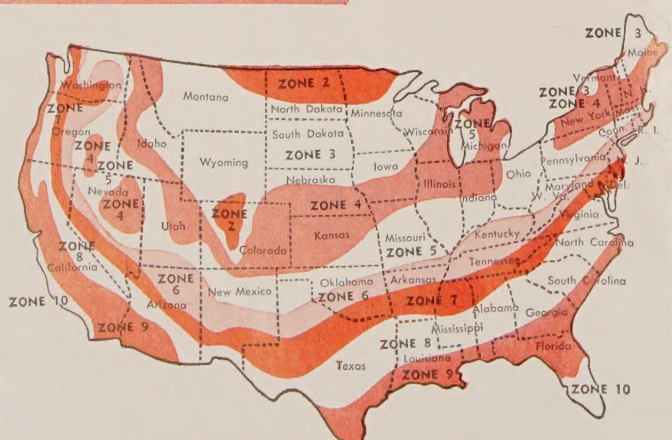

COLORADO BLUE SPRUCE

(Hardy Zones 2 to 6, Max. Hgt. 40 ft.)

Sorry, we are sold out on Colorado Spruce for spring of 1954. We have thousands coming along all the way from one year to 6 years old. This fall we will have some dandies to offer.

FEATHERWEIGHT PACKING TO SAVE YOU MONEY

Because it is not possible to determine shipping costs in advance, plants are priced FOB Elsberry. Shipments will ordinarily go forward RR Express and this is usually more satisfactory to you, except on small packages which will be sent Parcel Post. Our sturdy, feather-weight packing keeps shipping charge to absolute minimum—average is 6% of plant cost.

HARDINESS ZONE MAP OF THE UNITED STATES

Where Will It Grow?

Our Hardiness Zone Map, adapted from information compiled by Arnold Arboretum and U. S. Department of Agriculture, is the best means of indicating areas where any shrub or evergreen we list can be expected to thrive. From the map, find your own hardiness zone. Then note the zone designations after each variety listed. If the zones designated include your own, you can expect the variety to suit your climate.

Sometimes plants may be successfully grown outside their normal zone, particularly if given extra protection. For example, *Magnolia grandiflora* is a zone 6 plant but here at Elsberry, (near the northern edge of zone 5) we have been growing a northern strain successfully for several years. You should be wary of taking plants outside their designated zones, however, unless you are willing to experiment.

Of course, growth of our plants is controlled by factors other than minimum temperatures, on which this zone map is based. Ordinary good growing conditions are needed to make any plant thrive. Plants having protection against sweeping winds are generally favored, particularly during the establishment period. Well drained soil (more vital than soil fertility) is important to almost any woody plant, as roots must breathe as well as tops. Mulching is always beneficial. These and other growth factors are mentioned in our plant descriptions where they are particularly important and are covered in greater detail in our planting instructions that accompany each shipment.

MAKING YOUR PLANTS THRIVE

It is **easy** to plant FOR-REST KEELING Evergreens and other plants and to make them thrive!

With every order we send our own leaflet on planting, fertilizing, watering and mulching to secure rich, lustrous growth.

Our varieties have been selected with resistance to disease and insects in mind, but our leaflet also tells how to control pests that may appear. Simple directions for pruning to develop and keep the growth form you want are included.

Our 12 Favorite Flowering Shrubs

and they will be your favorites too, when they embellish your garden with color and fragrance.

One doesn't have to have a multitude of varieties to achieve the utmost in gay color effect. Indeed, the most striking landscape composition is accomplished by massing several plants of a single variety in a group, border, background or screen. We have tried to help you in your selections by restricting our list to the better and more reliable varieties.

Note our emphasis on low-growing and dwarf shrubs, so important with modern architecture.

CARDINAL BUSH

(Weigela parviflora)

(Hardy Zones 4 to 9, Max. Hgt. 6 ft.)

New shrub, our favorite among many Weigelas, this lovely plant is virtually covered with hundreds of dark red blooms in late May. Sporadic blooms dot the plant throughout the summer. Withstands almost all climatic conditions and soils—plant in sun or partial shade. We think this is one of the best, hardiest, and lovely new shrubs we can offer you.

FORSYTHIA "SPRING GLORY"

(Hardy Zones 4 to 9, Max. Hgt. 8 ft.)

If you have ever seen a Forsythia, you know it is one of the best. (Haven't we all?) You'll never love any other shrub as much as this "Spring Glory". Large lemon-yellow flowers completely smother the branches. Forsythias officially open the spring season and if you want a traffic-stopper for your garden, be sure to include a group of "Spring Glory".

DOUBLE PINK FLOWERING ALMOND

(Hardy Zones 4 to 9, Max. Hgt. 4 ft.)

Hundreds of tiny double pink flowers smother the branches of this dwarf shrub in early spring before leaves appear. Dark green foliage. Excellent, compact shrub for foundation planting.

CHINESE HYBRID LILAC

(Hardy Zones 5 to 8, Max. Hgt. 8 ft.)

We have tried and examined about every variety of Lilac and for sheer lovely effect, ease of culture, modest size, good foliage and reliability in producing abundance of clear, lilac flowers, we rate this variety tops. At our mother's home we have a 50-foot screen of Chinese Hybrid Lilac that is a neighborhood delight each year. Most Lilacs, you know, take years and years to bloom but this Hybrid blooms first year and abundantly its second year.

HYDRANGEA, HILLS OF SNOW

(Hardy Zones 4 to 9, Max. Hgt. 4 ft.)

Easily our favorite Hydrangea. Covered with huge pure white heads of flowers July to September, a fine solution for the shaded side of your house. Plants set out this spring will provide some bloom and a rolling mass of white next year. Field-grown, 18- to 24-inch clump.

PRICES of Flowering Shrubs

All flowering shrubs field-grown, 2-3 ft., except when designated otherwise. Your choice of varieties in any combination.

Each	Per 3	Per 10	Institutional Price Each Per 30 or More
\$1.25	\$1.20	\$1.10	\$1.00

RED FLOWERING QUINCE

(Chaenomeles "Red Bird")

(Hardy Zones 4 to 9, Max. Hgt. 6 ft.)

Remember your delight as a child in first viewing a Flowering Quince ablaze with bloom from inside out? I can still remember doing a "double-take" to see if the plant was actually on fire.

Plant breeders have improved the plant since then and our scarlet flowered form, "Red Bird" brings you a bushel of breath-taking bloom garnished with varnished, dark green foliage.

Especially suited for hedging or border, or to intersperse with evergreens in the foundation planting. (Field-grown, 18 to 24 inches.)

FRAGRANT HONEYSUCKLE

(Lonicera fragrantissima)

(Hardy Zones 4 to 9, Max. Hgt. 8 ft.)

Rare shrub whose creamy flowers will fill your spring garden with delicate and bewitching fragrance. Masses of ruby fruits appear in early summer before other shrubs—a most welcome treat for song birds. Plant in sun or partial shade, as its lustrous foliage, blue-green below and deep emerald above, persists well into winter. Dense semi-evergreen character and moderate 6 to 8 ft. height make it indispensable for background.

Flowering Almond

ENCHANTMENT MOCK ORANGE

(Philadelphus, Enchantment)

(Hardy Zones 4 to 9, Max. Hgt. 8 ft.)

Another new shrub which certainly lives up to its name. Enchanting, large, double, white blooms which are very fragrant. Blooms freely in May and June. A big improvement over the old Mock Oranges. Plant in sun, and enjoy the beautiful blossoms and lovely fragrance. Plant this spring.

"CHRISTMAS BERRY"

(Ilex verticillata)

(Hardy Zones 2 to 9, Max. Hgt. 9 ft.)

A true Holly but one whose leaves are replaced in winter with heavy masses of bright red berries that remain through the holiday season. In fact, berries appear while leaves are still green, presenting an attractive color combination. Good autumn foliage color. Very hardy. One of the really better shrubs and we recommend it to you highly. Field-grown, 18 to 24 inches.

American Highbush Cranberry

(Viburnum trilobum)

(Hardy Zones 2 to 8, Max. Hgt. 12 ft.)

Better than the older European Highbush Cranberry. A beautiful shrub adorned with great clusters of brilliant red berries that appear in late summer and remain through the winter. Huge white flower clusters, 4 in. across, in early spring.

If we could offer you but one shrub for your border, or for screening, or background, we would be tempted to make it American Cranberry bush. It is rivaled by few other tall-growing shrubs. A screen of a dozen plants can make your garden outstanding in the neighborhood.

DWARF WINGED EUONYMUS

(Euonymus alata compacta)

(Hardy Zones 3 to 9, Max. Hgt. 4 ft.)

Finest dwarf shrub that we know today. The fall foliage is a vivid pink-crimson, with reddish berries. It is quite compact in growth and colors more brilliantly in the fall than any other plant in its family. Makes a splendid specimen and has been used in hedges requiring practically no clipping. Try a few Dwarf Euonymus this spring . . . next fall you'll be ordering more. 4-year plants, 10 to 15 inches.

BEAUTY BUSH

(Kolkwitzia)

(Hardy Zones 4 to 9, Max. Hgt. 10 ft.)

Truly a plant which lives up to its name, Beauty Bush is considered the showiest of the hundreds of introductions by E. H. Wilson of the famed Arnold Arboretum. A profusion of bell-shaped, shell-pink flowers appear in June, weighing down the arching, graceful branches with the abundance of bloom. Requires no special attention of any kind. A "must" for your flowering shrub bed.

Flowering Ornamental Trees are NECESSARY

WASHINGTON HAWTHORN

(Hardy Zones 4 to 7, Max. Hgt. 30 ft.)

Best of approximately 500 varieties of Hawthorns. Our Washington Thorn are the nicest, bushiest plants you have ever seen. They are unexcelled as a small specimen tree for modern home planting and for hedging and screening they are superb.

We are amazed at the way these trees laugh at drought, winds and other vicissitudes of nature. For gay flower effect and lustrous foliage in summer, masses of berries in winter and brilliant hues in autumn and charm throughout the year Washington Thorn is tops.

Our plants are heavy-calibered with many stems—ideal form for hedging, screen or specimen, 3 to 4 ft., field-grown.

Each	Each Per 3	Each Per 6
\$3.25	\$3.15	\$3.00
Institutional Price Each Per 20 or More \$2.50		

Washington Hawthorn Berries

Washington Hawthorn

PRUNUS THUNDERCLOUD

(Hardy Zones 3 to 6, Max. Hgt. 24 ft.)

Replaces earlier forms of Purple Leaf Plums as it is generally recognized as finest in color, form and hardiness. Color in the garden is becoming more and more important and the reddish purple foliage of "Thundercloud" assures a rich mass of needed color shades from early spring until heavy frost. In late April clusters of pink flowers cover the tree and add to its beauty. Easy to grow.

Each	Each Per 3	Each Per 6
\$1.65	\$1.60	\$1.50

Prunus Thundercloud

GOLDEN RAIN TREE

(Hardy Zones 5 to 9, Max. Hgt. 25 ft.)

Nothing so describes this tree as its name. In midsummer the whole tree is a veritable cascade of golden bloom. There are a number of trees along the highway above our nursery and every year astounded travelers stop in to ask the name. Interesting bladder-like pods follow the flowers. Only one other tree hardy in the North has truly yellow flowers. A splendid small tree for flower and light shade.

Each	Each Per 3	Each Per 6 or More
\$2.25	\$2.15	\$2.00

HOPA CRAB

(Hardy Zones 4 to 6, Max. Hgt. 20 ft.)

Finest of the Flowering Crabs—masses of rose-colored blossoms in May followed by large, crimson Crabs (crimson all the way through) that are not only highly decorative but are excellent for preserve making. Hopa is free of pests and blights that affect so many Crabs and is a good strong grower.

When this tree breaks into bloom you wouldn't part with it for anything. A most reliable flowering tree for your grounds. Field-grown, 4-5 ft., well branched.

Each	Each Per 3	Each Per 6
\$2.25	\$2.00	\$1.90
Institutional Price, Each Per 20 or More \$1.75		

RED BERRIED MOUNTAIN ASH

(Hardy Zones 2 to 5, Max. Hgt. 40 ft.)

Our favorite of the many Mountain Ash grown. Everyone who has seen Mountain Ash heavy with clusters of bright red berries through the autumn days will agree it is a gorgeous sight to behold. Excellent pyramid form. Fine foliage which takes on warm autumn coloration. No finer tree existing to line a driveway.

Hardiness makes it particularly good in far North. Grows better north of Zone 5.

Each	Each Per 3	Each Per 6
\$2.60	\$2.50	\$2.25

Flowering Dogwood

FLOWERING DOGWOOD

(Hardy Zones 4 to 9, Max. Hgt. 30 ft.)

Unquestionably the best ornamental small tree native to our northern woodlands. Bold, snowy flower display before leaves appear; handsome lustrous foliage throughout summer turning scarlet in autumn; bright red berries and excellent silhouette in winter. A superb little tree for specimen or massing against evergreens.

Field-grown, 2-3 ft., moss-balled.

Each	Each Per 3	Each Per 6	Institutional Price Each Per 20 or More
\$2.25	\$2.15	\$2.00	\$1.75

PINK FLOWERING DOGWOOD

(Hardy Zones 4 to 9, Max. Hgt. 30 ft.)

Identical to White Flowering Dogwood, except for porcelain-pink flowers. No plant possesses more breath-taking beauty when in bloom.

Each	Each Per 3	Each Per 6	Institutional Price Each Per 20 or More
\$3.75	\$3.60	\$3.40	\$3.00

REDBUD

(Hardy Zones 4 to 8, Max. Hgt. 30 ft.)

Choice native small tree laden with masses of purplish pink flowers at break of spring. Pleasing heart-shaped foliage and picturesque form. Excellent for accent in shrub border. Or a grouping of 3 to 5 Redbud planted close together—perhaps 5 feet apart—will present a breath-taking picture. Completely hardy. Will take full sun or considerable shade. One of the finest small trees for naturalizing.

Field-grown, 3-4 ft., branched.

Each	Each Per 3	Each Per 6	Institutional Price Each Per 20 or More
\$1.50	\$1.40	\$1.25	\$1.10

SAUCER MAGNOLIA

(Magnolia soulangeana)

(Hardy Zones 5 to 9, Max. Hgt. 25 ft.)

This eye-catcher is best known and best loved of all Magnolias. Huge pinkish orchid blossoms, large as saucers, appear before the foliage and completely cover the tree. Broad, rich green leaves lend a tropical appearance through the summer. Our plants are cutting-grown and bloom when very young. Plants 3 or 4 ft. tall, often have several flowers.

Each	Each Per 3	Each Per 6 or More
\$2.25	\$2.15	\$2.00

OUR SATISFIED CUSTOMERS

Your Best Guarantee

From coast-to-coast you will find Forrest Keeling Multiflora Fences protecting land and livestock. It's the Fence of a Lifetime and these customers have been kind enough to tell us their experiences with our Multiflora Rose.

"Want to add that the order for the 10,000 plants for the Ranch came through in fine shape, and they are very healthy plants, and am sure they will thrive." — *Johnstown*

FROM
COLORADO

FROM
INDIANA

"Last Saturday I received the shipment of Multiflora Roses ordered from you earlier in the season, and forwarded to me at Topeka, Indiana.

"During the past years I have had occasion to order nursery stock from various nurseries situated from the Atlantic Coast to the Rocky Mountains, and including localities in the South and Southwest, but the little shipment received from you, both in quality of the plants and the care taken in packing is as fine if not the finest I have ever received."

"Please accept my thanks for the more than honest way in which this order was filled. It will be a pleasure to recommend the Forrest Keeling Nursery to any of my friends and acquaintances." — *Topeka*

Letters of Praise for Forrest K

These excerpts are taken from

FROM
MISSOURI

"Two years ago I bought several thousand multiflora roses from your nursery. They have been so successful I want to put some more in this fall.

"Would appreciate it if you would reserve 850 two year old plants for me."
— *Kirkwood*

"It is now six months since I planted a fence of Multiflora Roses around my residence, and all my neighbors are watching it with keen interest. They all are amazed that every one of the plants is growing, because when I planted them they received no more care than just being placed in the soil, which is nothing but 'old hard pan'." — *Maplewood*

Selecting parent stock for Thorniness, Disease Resistance and Vigor.

FROM
VIRGINIA

"My husband and I were well pleased with your recent shipment of five hundred Multiflora roses (payment for which is enclosed). They were of unusually high quality, far superior to roses we have purchased from other sources." — *Spencer*

Keeling Multiflora Fence!

from letters on file in our office for inspection.

12 year Multiflora Fence Planted by Hugh Steavenson — "Horse-high, Bull-Strong, Goat-tight!"

"Last year I ordered a thousand plants of Multiflora Rose from you and I want to express my thanks for the nicest plants I ever received from any nursery — they were in perfect condition." — *Wakeeney*

"The farm advisor looked at the one year old Multiflora hedge and said it is the best he has seen. He thinks it will hold stock at two years old." — *Lawrence*

FROM
KANSAS

FROM A SOUTHERN STATE GAME AND FISH COMMISSION:

"We would like to place an order with you now for next fall delivery for 25,000 Multiflora Rose plants. The 20,000 plants we received from you this fall were excellent stock."

"You will be interested to know that survival of the plants so far is almost 100%. They are making vigorous growth at this time."

Forrest Keeling Nursery
Elsberry,
Missouri

Dear Sirs -

Thank you very much for sending our Spring order of 4000 Multiflora Roses as you did. They came in fine shape. The 1000 we ordered last fall came thru the winter just wonderful. We straw mulched them and they are beautiful now and so sturdy.

We hope to order from you again and encourage others to do likewise. It has been a pleasure to deal with you.

Thank you very Sincerely,

Mrs Mildred C Getty

Mr. Hugh Steavenson, Proprietor
Forrest Keeling Nursery
Elsberry, Missouri

Dear Mr. Steavenson:

We have been planting some multiflora roses each year for the past few years. This year we received the information concerning your product and ordered 1500 of your No. 1 Standard plants.

They arrived at our farm a few days ago, and they are by far the finest plants that we have received from any company. They were quite uniform, lots of roots, and were certainly alive in every respect.

As the originator and developer of this fine product, I thought you would be pleased in knowing how well satisfied we are with the plants that you sent us. We have a practical operating Hereford farm, and we need these multiflorarose fences for windbreaks on the farm. We have a rolling hilltop farm, and there is not too much protection for livestock. We feel that, aside from the beauty that this fence will add to the farm, it will be invaluable for the protection of our livestock in the winter months.

Thanks a lot for taking such good care of us.

Very truly yours,

A. K. Simpson

FROM
GEORGIA

"The wonderful Forrest Keeling Multiflora Rose plants have arrived in excellent condition, and we are delighted with these splendid plants." — Mount Berry

FROM
FLORIDA

"The Rosa multiflora plants received recently from your nursery have been planted in a row next to the thornless multiflora that we use here as a root stock. Perhaps you will be interested to know that these plants were set in the midst of our recent cold spell and I assure you that they are completely dormant. This hedge will be of great interest to all of us as a demonstration, and we are deeply grateful for your kindness. Incidentally, I wish to congratulate you upon the appearance of the package. This is one of the most attractive and correctly packaged horticultural items that I have received in some time." — Gainesville

FROM
IDAHO

"This will confirm the order placed earlier for fall delivery of 25,000 multiflora rose."

"The price is very reasonable for the quality of the stock ordered from you last year. All plants received, including those heeled in for spring planting, are doing very well."

FROM DIRECTOR OF A WESTERN
STATE GAME COMMISSION:

"The plants we procured from you last year are doing very fine. As a matter of fact, they were the best multiflora rose seedlings that we procured during the year."

FROM OHIO:

"I am writing to ask about the price of Multiflora Rose again this year. Practically none of the roses I got last fall from you died. They are splendid. I will need perhaps 2,000 or 2,200 this fall as I bought the balance of our old farm from my brother." — *Willoughby*

FROM ILLINOIS:

"Of the 1,000 plants of your No. 1 Size which I set out last March all have made excellent growth except three — run over by a wheel in plowing. Attaining an average height of 28" in the past summer. I am willing to hazard the guess that I will have a cattle fence in less than three years!" — *Henry*

FROM WISCONSIN:

"The winter of '50-'51, it was 40 degrees below zero here. It never killed a plant. The tips froze back a little." — *Brownston*

FROM NEW JERSEY:

"The Multi-flora Rose Hedge that I planted three years ago from you is excellent. I planted them along the road near the cold frames and this does a wonderful job in protecting the windows from dogs or other animals, and is a wonderful windbreak." — *Caldwell*

FROM TENNESSEE:

"Want to express my thanks to you for your promptness in handling my recent order for roses — also to say I am highly pleased with the healthy appearance and fine root system of your plants." — *Nashville*

FROM ARKANSAS:

"Please send 10,000 of your number one plants. It might interest you to know that all we have purchased from you in the last four years are doing well." — *De Vall's Bluff*

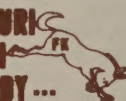

FROM MISSISSIPPI:

"Please send immediately 1200 No. 1 grade Multiflora — I am an old customer re-ordering an item which has proved more than satisfactory." — *Jackson*

SOUTH CAROLINA Drive-in-Theater Owner:

"If this Multiflora continues to grow in the future as it has in the past, these windstorms high insurance rates and other troubles connected with ordinary fences are a thing of the past." — *Anderson, S. C.*
